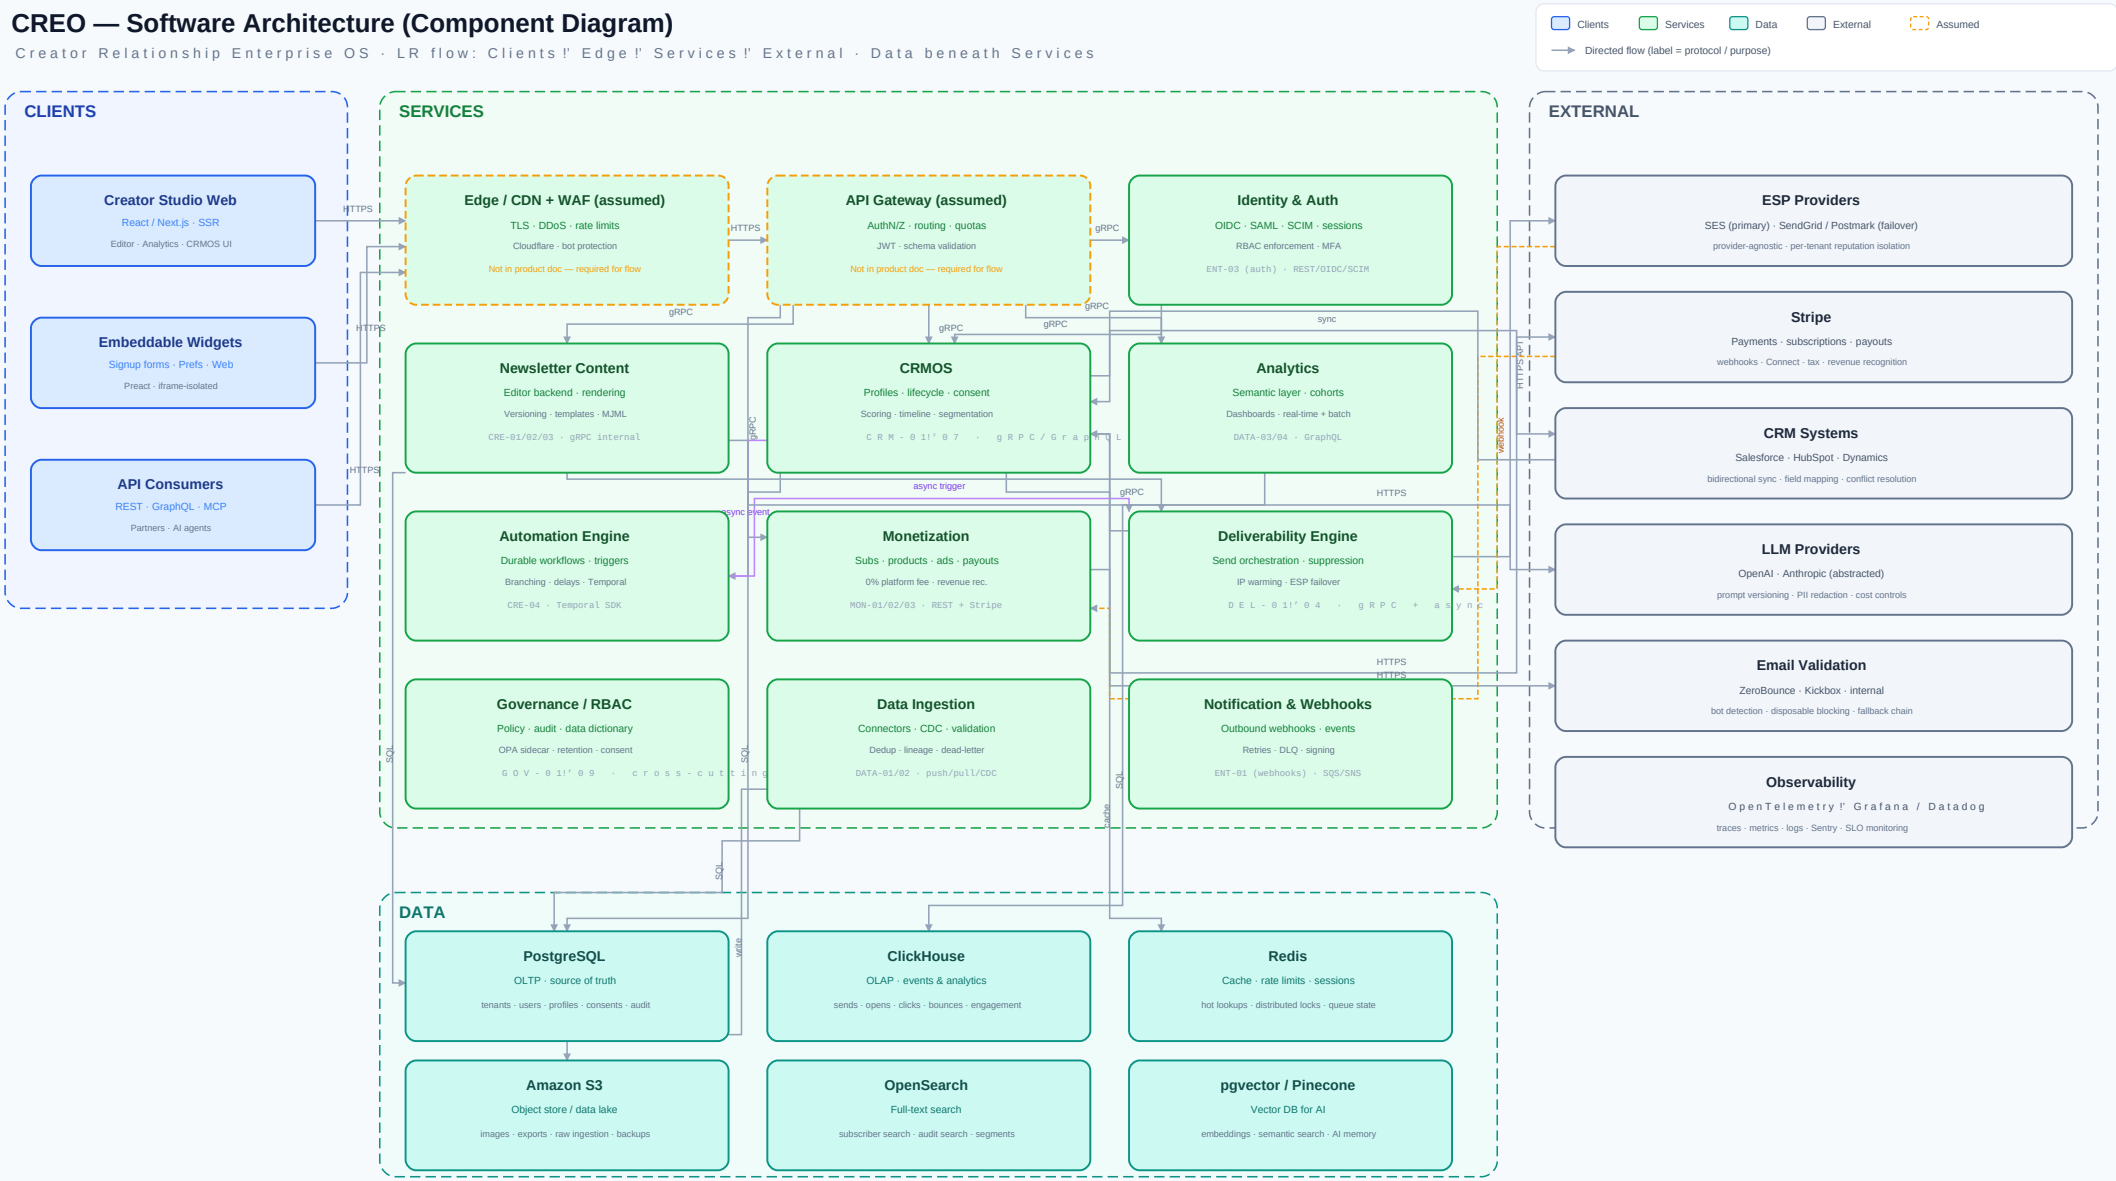
CREO — Software Architecture (Component Diagram)

Creator Relationship Enterprise OS · LR flow: Clients → Edge → Services → External · Data beneath Services



CROSS-CUTTING PLANES

Governance: OPA policy sidecar · RBAC · append-only audit log · retention & deletion · data catalog — evaluated at every service boundary

Security: WAF · mTLS between services · KMS encryption at rest · secrets in AWS Secrets Manager · DLP on exports · tenant_id RLS on every row

Observability: OpenTelemetry tracing (correlation IDs) · RED/USE metrics · structured logs · SLOs / error budgets — every service emits to OBS
